CLAIMS 14-17 ARE PRESENTED FOR
EXAMINATION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 14-17 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the compound carbenoxolone compound does not provide enablement for all compounds which inhibit the reductase activity of 11-Beta-hydroxysteroid dehydrogenase I in neural tissue. There is a lack of compounds which would enable the skilled artisan to practice the invention. Only one compound has been identified by the applicants. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims 14 and 15. Applicants' specification only identifies one compound which has the claimed activity, i.e. carbenoxolone.

Claims 16 and 17 are rejected since they read on rejected claims 14 and 15.

Therefore, applicants' generic claims 14 and 15 are deemed to be beyond the scope of the enabled disclosure in the specification.

The prosecution of this application will be advanced if claims 16 and 17 are incorporated into claims 14 and 15.
